SUMMARY

Frontend-focused Software Engineer with 2+ years of experience shipping production web applications. Proficient in JavaScript (React), with full-stack experience in Node.js and DynamoDB. Fast learner who picks up new products, codebases and tools on the job and ships client-facing features to production.

WORK EXPERIENCE

Software Engineer (Frontend), Voltuswave Technologies **July 2025 - Present**

Tech stack: *React 18, TypeScript, Redux Toolkit, React Query, MUI, Node.js, DynamoDB, Git, Jenkins*

- Built and launched a support management application in the VoltusFreight ERP product, with one shared schema and backend for web and mobile. In production with 5 clients (200+ tickets), with email and push notifications (new ticket, comment, status change, escalation, reassignment) that deep-link to the exact ticket.
- Shipped 10+ features and fixed 80+ bugs within a year on a production healthcare web platform (React 18, TypeScript, Redux Toolkit, React Query, MUI).
- Built a token-efficient AI workflow with Claude (reusable skills, context compaction, project-level instructions) to deliver faster at lower cost, using the Playwright MCP server for AI-driven browser test generation and reviewing AI-generated code and test results before release.
- Extended a Node.js/TypeScript user-service (DynamoDB) with new product capabilities, including user preferences and multi-program enrollment history, plus a reusable date-display utility.
- Built POCs to test new ideas, and improved data accuracy and code reliability by filtering out invalid data and adding stricter typing to backend handlers.

Application Developer, Ninepages Techsolutions Pvt Ltd, Agra **Sept 2024 - June 2025**

Tech stack: *React.js, React Router, Node.js, Express.js, JWT, bcrypt*

- Developed React single-page application features with React Router for smooth, intuitive navigation.
- Built reusable UI components that kept the codebase consistent and easier to maintain.
- Built REST APIs with Node.js and Express, secured with JWT authentication and bcrypt password hashing.

Front-End Developer Trainee, ADRDE (DRDO) **June 2023 - Aug 2023**

Tech stack: *React.js, React Router*

- Accomplished a reduction in interface load time by implementing lazy loading and code splitting in React components.
- Enhanced user navigation experience by implementing dynamic routing with React Router, ensuring context-aware transitions and smooth page loads.

PROJECT

Learning Management System

- Built RESTful APIs with Node.js and Express to handle course enrollment, authentication, and data retrieval.
- Incorporated pagination and filtering for course listings, enhancing the user experience with faster data loading.
- Integrated Redux for global state management, enabling efficient handling of authentication, course data, and user preferences across components.

Real Estate Web Application

- Implemented advanced filtering and sorting features, allowing users to find properties based on price, location, and preferences.
- Applied role-based access control (RBAC) for admin and user permissions.
- Designed and managed MongoDB schemas using Mongoose, optimizing database queries for faster performance.

EDUCATION

Bachelors of Technology in Computer Science Engineering **Oct 2020 - July 2024**

Dr. APJ Abdul Kalam Technical University

SKILL, TOOLS AND TECHNOLOGIES

- **Languages:** HTML, CSS, JavaScript (ES6+), SQL
- **Libraries and Framework:** React.js, Node.js, Express.js, Redux, Redux Toolkit, React Query, MUI, Tailwind CSS, Axios, REST API
- **Backend & APIs:** JWT Authentication, Role-based Access Control, GenAI Integration
- **Database:** MongoDB, DynamoDB, MySQL
- **Tools:** Claude Code, Agile/Scrum, Git, GitHub, Jenkins, Notion, Obsidian, Figma, Canva, Postman, VS Code, MongoDB Compass
- **Currently Learning:** TypeScript, Next.js, Vitest and React Testing Library

ADDITIONAL INFORMATION AND CERTIFICATIONS

- Community Lead - Google Developer Student Club (2022-2023); Co-organiser and Track Manager, GDSC WoW Delhi NCR (2023): managed a team of 100 for an event with ~1700 attendees
- Open-source contributor (front-end) - GirlScript Summer of Code 2022, Script Winter of Code 2021-22
- Publication: Smart Mirror for Ambient Home Environment
- Oracle Cloud Infrastructure Foundations Associate Certification
- Accenture’s Virtual Work Experience Certification
- CertiProf’s Remote Work and Virtual Collaboration Professional Certification
